SPOKANE INTL (KGEG) AMDT 1

This amendment was started to update the airport MAG VAR 08/17/2017, changing from 18E/2000 to 15E/2020. ATC had also requested expansion of the RWY 21 DVA to include headings 110 CW 025 inclusive with full knowledge that the request would result in the DVA requiring a CG above the standard 200 ft/nm. Coordination with ATC indicates the GEG ASR-9 has been updated to FUSION, Stephnie Anason has replaced Michelle Skomars as the Facility Manager and Cassandra LaBelle has replaced Brian Vidis as the Operations Support Manager. At the last minute the MAG VAR change was changed to be 16E/2010 with the intent of updating to 15E/2020 next year

Results:

RWY 3 authorized headings 178 CW 209 or 210 CW 058 within 12 NM of the DRP, terrain 473541.00N/1171757.00W.

RWY 7 authorized headings 125 CW 254 or 255 CW 055 within 12 NM of the DRP, terrain 473541.00N/1171757.00W.

RWY 21 authorized headings 109 CW 024 within 12 NM of the DRP, terrain 473541.00N/1171757.00W. Requires minimum climb of 290 FT/NM to 3200. CONTROLLING OBSTACLE: 2979 FT MSL AAO ON TERRAIN AT 473357.72N/1173410.86W (CG AND CGTA).

RWY 25 authorized headings 108 CW 062 within 12 NM from DRP, 4447 FT MSL tower (53-000450) at 473446.00N/1171750.00W and 4552 FT MSL tower at 473541.00N/1171757.00W.

RADAR Facility and MAG VAR Information: Procedure predicated on FUSION (Full-time MSSR) using GEG ASR-9 at 473711.04n/1173307.00W. MAGNETIC COURSES BASED ON AIRPORT MAG VAR 16E: EPOCH YR 2010.
