Project Name: DTW - correct altitude on RNAV (RNP) X RWY 21L

Project Reason: Terminal route NESBI to PUKLE minimum altitude should be 2000. Altitude is charted and documented correctly in the profile view and was shown correctly on the FIG used for the flight inspection. Due to a form processing error, the altitude shows as 2200 on the transmitted 8260-3 Terminal Routes section. This NOTAM corrects the error.
