

## AOD TPP PDF

Spine template for bound volume is attached to the front cover. The spine can be resized to fit the printed volume. The spine can also be removed to print Loose Leaf versions.

For 56 day volumes -The first two pages of the pdf are the front cover and inside front cover (table of contents). The last two pages are the inside back cover (climb descent table) and back cover.

For 28 day volumes- The first two pages of the pdf are the front cover and inside front cover (table of contents). The last two pages are the inside back cover (blank page) and back cover.

These pages do not have page numbers or dates on the side.

An intentionally left blank page template is posted as a separate file if needed.

Pages with brown are printed using % values of brown. The printer can determine the %value, as long as the different shades are clearly distinguishable. Commonly used variations are 12-15% between the levels.
