

VOR RWY 18
SOUTHEAST COLORADO RGNL (LAA)

Diagram illustrating the relationship between LAA, WAAV, and DME minima. The diagram shows a flight path starting from a point with a 4600 MSL altitude, turning to a 6000 MSL altitude, and then descending to a 4540 MSL altitude. The descent is marked with a 169° angle and a 4.5 NM distance. The diagram also shows a 349° angle and a 169° angle. The diagram includes a table of minima values for LAA, WAAV, and DME.
